

**Confidential****Supervisor's Review of USB RIFCH PhD Thesis**

Surname of the PhD student: Ing. Vojtěch Kašpar	Name of supervisor: Prof. Dipl.-Ing. Linhart Otomar, DSc.
Title of PhD thesis: Sperm competition in common carp ( <i>Cyprinus carpio</i> ).	

**OVERALL COMMENTARY ON THE PhD THESIS**

He was very active student in my and Martin Flajšhans laboratories during four years PhD study (2006-2010) with good publication level, excellent creativity, with great dedication and a wide range of activities, including the responsibility to share in the management of laboratories. Since 2002 or 2003, I became familiar with him through idea develop molecular laboratory in Vodnany and as supervisor of his master theses belonging to sperm carp competition.

Moreover, after his master theses I understood that is intelligent, competent and future competitive researcher. For example as student of first year PhD study he successfully presented results in one of the prestigious conference, meaning Symposium of Fish Physiology Reproduction in St. Malo, France 2007. Without "Vojta" creativity, simplicity for science and without his dedication and vigor I can not imagine work in my and Martina Flajšhans laboratories. But not only in our laboratories also at laboratories in Catholic University of Leuven (Belgium), St Andrews Biological Station (Canada) or in Hokkaido University (Japan). He developed contacts in many countries and I believe, that will be for him simply possible to get anywhere in the world post-doc position. He is published or accepted for publications more than 12 peer-reviewed papers. In most publications he is not the first author, but everyone who worked with Vojta clearly understood, that they all worked fairly. Vojta is able to work and publish, and engage in high-science laboratories in the genetics of reproduction of fish. I recommended to him in many times, that is better be less active in many fields of research and urged him for greater focus on "his" specialization. In the last two years of study, I did understand and felt that this is strictly a collective researcher, who was born for the success of the whole. For future success he will do it the best and downright look forward to future activities and results at the laboratory under led of Vojta.

**FINAL RECOMMENDATION**

- can be recommended for defence of PhD Thesis  
 can be recommended with reservations for defence of PhD Thesis  
 can not be recommended for defence of PhD Thesis

Vodňany, 09 June, 2010
