

Dear Dr. Kodrik,

I have now had a chance to read the MS thesis of Ms. Hana Kratochvilová. I am happy to report that she has done an excellent thesis, one that is certainly worthy of the Masters degree in the US. Hana certainly knows the literature of this field well, has carried out an interesting series of immunohistochemical and morphological protocols, and has written up her research using good, standard scientific English. The work is timely and clear enough to allow publication in an excellent, international journal.

One very minor correction: on page 15, last line, the word "parallel" is misspelled.

Thank you for giving me the opportunity of reading this excellent piece of work. You should be very proud of Hana.

Best wishes,

David Evans
