POSUDEK ŠKOLITELE

SUPERVISOR'S RECOMMENDATION

Nové Hradý, 17.1.2010

To Whom it may concern

Jaroslava Kohoutová joined my group in 2004, at this time I employed her as a highly-qualified university trained laboratory technician to get the molecular biology lab of my group set up, and it was indeed a difficult task, as she was practically the only one in my group with real experiences in molecular biology at that time. After setting up the lab she got more and more involved in the actual research and decided in 2006 to immatriculate in the PhD study program in plant physiology at the Science faculty in České Budějovice, a decision I very much supported as from the very beginning it was clear to me, that she has much higher ambitions than only to conduct „ordered“ research. And indeed, she managed very well the PhD- study program and the research aim within, while the whole time still being a full time research employee of the Center of Biocatalysis and Biotransformation.

According to my assessment, Jaroslava Kohoutová was a very good student, extremely quick in grasping the concepts and ideas. I found her a skilled researcher with strong theoretical background and a very clear mind about the aims and objective of her research. I am highly impressed and pleased with her research performance, dedication and devotion to work. She has a highly cooperative and helping attitude towards her colleagues and other fellows. I am sure that her research, presented in the submitted thesis, will convince the reviewers and the doctoral commission that Jaroslava Kohoutová fulfills all demands needed for a successful defence of her doctoral thesis, and for my side, I can clearly recommend her for being awarded the PhD-degree.

doc. RNDr. Rüdiger H. Ettrich, Ph.D.,
vedoucí oddělení struktury a funkce proteinů
Ústav systémové biologie a ekologie AVČR v.v.i.
