SUPERVISOR EVALUATION FOR MR. JAN KOTAL

České Budějovice, 13 June 2011

Dear chair of the thesis evaluation committee

This is to let you know about my evaluation statement for Mr. Jan Kotal.

Jan Kotal is a kind and friendly person, and he is always excited when it comes to understand "how biology works". He has shown excellent abilities to perform scientific research and to understand scientific subjects. He has a natural ability to interact with people; his communication skills are very good and he has a very stable and positive personality. In spite of his youngness, he was able to absorb the maximum during his Bachelor thesis practical in our group and he was an excellent team player as a member of our research group. I was personally impressed by his enthusiasm, motivation and commitment to science. He was immediately able to integrate into the everyday working environment and practices of our laboratory and to successfully apply his background and skills towards the successful completion of his projects. I have no doubt to propose the award of his Bachelor degree with a grade that will reflect his excellent performance during his work in our group.

Sincerely

Michail Kotsyfakis PhD
Thesis supervisor and head of the host laboratory
