

Průběh obhajoby diplomové práce:

After a short introduction by Prof. Brubhoffer, the student introduced the topics of her thesis. The basics of circadian clocks were presented as well as of photoperiodic clocks. The results were presented and finally the conclusions. The reviews of the supervisor and of the reviewers were presented. Marion answered all the questions of the reviewers to their satisfaction. The question of the commission followed - Marion answered on the question on the types of bonds between the studied interacting proteins; on the ADH1 in the plasmids used, on the use of replica plates. The student answered all of the questions.
