SUPERVISOR EVALUATION FOR Ms. Lovelyna Eromonsele

České Budějovice, 28 May 2015

Dear chair of the thesis evaluation committee

This is to let you know about my evaluation statement for Ms. Lovelyna Eromonsele.

Lovelyna is a kind and friendly person, and she is always excited when it comes to understand “how a scientific experiment is performed”. She has shown excellent abilities to perform scientific research and to understand scientific subjects. Her communication skills are very good and she has a positive personality. She was able to absorb the maximum during her Bachelor thesis practical in our group and she managed to finish all her research experiment within the anticipated time-frame. She was immediately able to integrate into the everyday working environment and practices of our laboratory and to successfully apply her skills towards the successful completion of her projects. I have no doubt to propose the award of her Bachelor degree with a grade that will reflect her excellent performance during her work and practice in our group.

Sincerely

Michail Kotsyfakis PhD
Thesis supervisor and head of the host laboratory
