

Průběh obhajoby bakalářské práce:

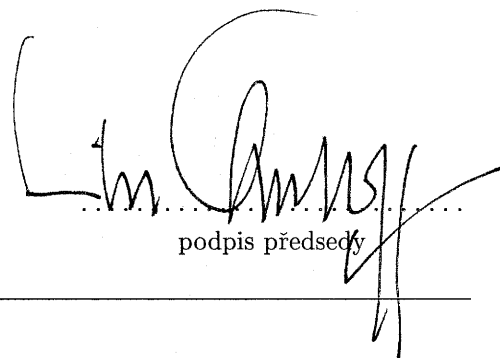

Prof. Trubheffer welcome the members of the commission, Stepan Demchyshyn and the audience. The reviewer was not present.

Stepan described the thesis, theoretical background about Borrelia and the restriction-modification system. Also, the molecular-biological methods used in the thesis were described. Next, the objectives of the thesis were shown together with results for the several topics studied. Finally, the conclusions were described.

Next supervisor's and reviewer's reviews were read. Stepan answered Dr. Melimovsk's questions to commission's satisfaction. Then, he answered questions of the commission (modelling, dot blot etc.).
