

Review of Master work reviewer

Name and Surname of Student	Anna BRIAND-BERGMANS
Qualification Work Title	Projects and territorial development
Name and Type of Study Programme	Regional and European Project Management / Navazující
Faculty / Department	Ekonomická fakulta / KRM
Supervisor	Le Squere Roseline, Dr.
Reviewer	Prof. Dr. Doris Fetscher

Thesis evaluation

1. Importance and difficulty of the topic 1.0

Note: The topic is very relevant for the developpement and internationalization of regions. The author could get a very intresting inside view in the described consortia.

2. Logical structure of the thesis 1.5

Note: The case study as a methodological approach has not been explained. The interviews should make part of the case study. For this reason the questionnaires and the findings in the analysis of the documents have not been interrelated.

3. Fulfillment of objectives 1.0

Note: The author could give a very interesting inside view in the topic and give an answer to all the initial questions.

4. Methodological approach 1.0

Note: All the methods have been conducted in a correct, transparent and logical way

5. Assessment of theoretical and/or practical contribution of the thesis 2.0

Note: The student was able to do the interviews during her internship. She has been involved in the work of the consortia and was able to get in contact with the interviewees. In general I miss a critical distance to the presented materials.

6. Handling of literature 1.0

Note: The author mentions relevant literature. Some of the chapters are very closly based on the work of Le Squere. This seems to be due to the fact that there is still not a lot of literature on this topic.

7. Formal aspects 2.0

Note: There are nearly no mistakes.

Conclusion

Thesis evaluation (note): **very good**

I recommend the thesis for defence: **YES**

Questions and comments

Critical comments and overall contributions, total value of the thesis

-

Questions and topics for discussion before the commission

In your research I missed the dimension of the collaboration with the other european partners and also with the incoming students and staff.

Could you tell us, why you didn't take this dimension into consideration?

How can a case study be conducted?
