Thesis evaluation

1. Importance and difficulty of the topic 1.0

2. Logical structure of the thesis 1.0

3. Fulfillment of objectives 2.0

Note: There was no hypotheses but research questions. One that looks like a main RQ is asked on page 1, others are asked on page 22. It could be recommended to rather state an objective and link to the research questions to it directly in one chapter.

4. Methodological approach 2.0

Note: Methods and techniques were opted for according to the assumption. Their limitations were later stated as well. The application of theory into the empirical part of the thesis should be better mastered.

5. Assessment of theoretical and/or practical contribution of the thesis 1.5

Note: Although not clearly stated, recommendations for further research could be revealed in the text.

6. Handling of literature 2.0

7. Formal aspects 1.5

Conclusion

Thesis evaluation (note): **excellent**

I recommend the thesis for defence: **YES**

Questions and comments

Critical comments and overall contributions, total value of the thesis

Abstract is rather supposed to provide some information on results. Here seems to rather inform on future plans.

Questions and topics for discussion before the commission

In your opinion, do you mean the project would have failed without any possibility of phone or Skype calls?
