**Supervisor's Review of USB RIFCH PhD Thesis**

Surname of the PhD student: Václav Nebeský	Name of supervisor: Prof. Pavel Kozák, Ph.D.
Title of PhD thesis: <b>Products from aquaculture: Market, quality and new product development</b>	

**OVERALL COMMENTARY ON THE PhD THESIS**

The Scientific and practical value, originality and quality of processing of PhD thesis are in a good quality. It is a complex of review, laboratory studies and practical development of products. The aim of the thesis was the evaluation of market and quality of products from aquaculture and to find the way of new product development. The first part of thesis review the trends in import and export of fishery products in the Czech Republic. Second part is laboratory study of student focusing on concentrations of metals and microelements in domestically produced and imported fishery products sold in the Czech Republic. The last part is focused on practical development of products from fish.

My comments related to the quality of the present PhD thesis will be rather simple and short. I believe that the results of the thesis are highly applicable for aquaculture sector. I evaluate this PhD thesis as successful.

Besides, I would like to say some words about Vasek himself and his character. Vasek worked on his topic independently even he was busy in his job which often differ from his Ph.D. topic. We only discussed the main idea and direction of his research or direction and he was able to solve the problems independently. His publication activity is not excellent but the practical result with impact on marketing are without any doubt. To finish it, Vasek has excellent abilities of human relations and it was real pleasure to be his supervisor.

**FINAL RECOMMENDATION**

- can be recommended for defence of PhD Thesis  
 can be recommended with reservations for defence of PhD Thesis
