## Questions and comments

### Critical comments and overall contributions, total value of the thesis

Very interesting topic that should be followed and extended.

Discussion should contain more of comparison and/or confrontation of results with existing theoretical background and/or with author's expectations or assumptions.

The author has clearly explained limitations of her research.

### Questions and topics for discussion before the commission

Despite the fact that the research is very limited, could the author present some practical implications (besides the theoretical implications - proposals for further research)?
