

Průběh obhajoby bakalářské práce:

The head of the commission, Dr. Alena Králová, welcomed the student and the members of the commission together with the audience. The student introduced the studied topic - ticks, TBEV virus, and the antiviral defence mechanisms. Next, the goals were shown and the methods together with the results. Summary and conclusions were presented. The supervisor (Martin Selinger) was not present, his review was read by J. Šterbe. Next, the opponent presented his review on the thesis and the student answered his questions. The student answered questions by the commission on cell viability in infected transfected cells, future way of work, number of repetitions.
