

**Průběh obhajoby bakalářské práce:**

Prof. Grubhofer welcomed the student Maximilian Kropf and the members of the commission. The supervisor, Dr. Bednářová was not present.  
 M. Kropf introduced the studied organism and the studied molecules, the background for the practical work and the experiments were described.  
 Main results of the thesis were shown and discussed.

Supervisor's statement was read by Dr. Šterba followed by the opponent's thesis review by Dr. Zehradničková. The student answered all her questions and then also questions of the commission. All of the answers were accepted and were correct.
