Note: Work represents an interesting topic with validity for future.

2. Logical structure of the thesis 1.0

Note: Logical structure of work is correct

3. Fulfillment of objectives 1.0

Note: The work verified the scientific questions

4. Methodological approach 1.5

Note: Face to face interview with combination of skype contacts are the adequate used methods

5. Assessment of theoretical and/or practical contribution of the thesis 2.0

Note: Practical contribution of thesis could be improved via comparison of differences between skype and face to face interviews

6. Handling of literature 1.0

Note: Thesis are based on sufficient literature sources

7. Formal aspects 1.0

Note: All formal aspects of were met

Conclusion

Thesis evaluation (note): **excellent**

I recommend the thesis for defence: **YES**

Questions and comments

Critical comments and overall contributions, total value of the thesis

Presented work focused on multilingualism and interculturality within interregional projects is focused on a very lively topic of communication based on different cultures. This topic is important for EU project which are based on such a kind of international team communication. In spite of modern technical equipment and possibilities for distance cooperation, the face to face contact remains still very important.

Questions and topics for discussion before the commission

I would like to know what were the differences if any between personal interviews and interviews via skype?

You mentioned the interesting question of difference of used languages between formal and informal communication. Could you tell us your results?
