

Assessment proposed by the supervisor of Bachelor's thesis: *recommend*Assessment proposed by the reviewer of Bachelor's thesis: *good***Course of the defence:**

Prof. Grubhofer welcomed the student, commission and guests. Mr. Samek described the problematics of glycobiology, glycan functions, and the role of specific glycans in arthropods antibodies. Then, he presented his results and discussed them.

The supervisor presented his review. The opponent, Dr. Lenka Malinová, was not present and her review was read by the commission. The student answered the questions, he sent the answers to the opponent in advance and the opponent was satisfied. The student answered questions on the salvaging of host proteins and incorporation of host proteins to tick cells and antibody optimization.

Assessment: *very good*Defence date: *18.9.2019*
