Note: The copied table on page 31 is a little bit disturbing from the formal layout point of view.

Conclusion

Thesis evaluation (note): **excellent**

I recommend the thesis for defence: **YES**

Questions and comments

Critical comments and overall contributions, total value of the thesis

The presented master theses deal with a very interesting issue of cooperation of multicultural teams in nursing and medicine. The research is based on interviews in a selected hospital and the used method of GAT 2 transcription system and coding of interviews with MAXQDA.

Questions and topics for discussion before the commission

Which training methods for personnel or process changes could help in communication among staff and patients from your point of view?
