

Assessment proposed by the supervisor of Bachelor's thesis:

Recommend

Assessment proposed by the reviewer of Bachelor's thesis:

Recommend, very good

Course of the defence:

Prof Grubhofer welcome the student, commission and the audience. All members of the commission were present! Mr. Tschernuth introduced the background of the selfish immune system, juvenile hormone, and the role of glucose and adenosine. Results on the all measurements and other experiments were shown and discussed.

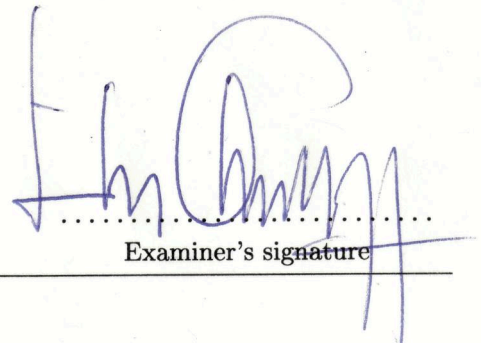

Supervisor and opponent presented their reviews and Mr. Tschernuth answered the questions. Questions from the commission were answered as well.

Assessment:

excellent

Defence date:

28.1.2020
