

Assessment proposed by the supervisor of Bachelor's thesis: *recommended*

Assessment proposed by the reviewer of Bachelor's thesis: *recommended, very good*

Course of the defence:

Prof. Grubhofer welcomed the student, commissar, and the audience. Mrs. Vu presented information on adhesive biopolymers and their possible applications. Then, she presented information on the studied proteins.

After presenting the aims, the student explained the used methods, showed the results and discussed them. The supervisor and opposite presented their reviews and the student answered all the questions. Then, the student answered questions of the commissar on labelling, Western blot, and adhesion test.

Assessment: *excellent*

Defence date: *22.1. 2020*
