Recommended, excellent

All members of the committee were present. Head of the commission Prof. Völkel welcomed Mr. Bayer, members of the commission and the jury. Mr. Bayer presented information on rotavirus fever bronchiolitis and the disease they cause. Goals of the project and methods used followed. Results obtained were presented and explained.

Supervisor, Dr. Rege and opponent Dr. Liesbörke presented their reviews and the student answered all the questions. Then, Mr. Bayer answered the comments and questions on the use of sera and the in vitro feeding.

The commission recommended this thesis for a stipend by the head of ICh for extraordinary prizes.

Score: 150
