

Assessment proposed by the supervisor of Bachelor's thesis: *Recommended*
Assessment proposed by the reviewer of Bachelor's thesis: *Recommend, good*

Course of the defence:

Head of the commission welcomed the student, commission, and the audience. All members of the commission were present. The student introduced the topic of photonics and light-harvesting materials and molecules. Then, the aims and the results were shown, followed by the discussion. Supervisor and opponent provided their reviews and the student answered the questions. Then, the student answered questions from the commission on spectroscopy, AFM images.

Assessment:

Very good
