**Comments of the supervisor on the student and the thesis:**

Amila Kličić was a gentle student. She followed my advice and was able to independently work in the laboratory during the experiments and performing the data analysis. Writing and discussing her results took more effort, but I hope she has learned it is important to pay attention to details and I am sure she will improve in the future. I am quite happy with the outcome of her work, and foresee a future publication in an impacted scientific journal including her results.

**Conclusion:**

In conclusion, I  
r e c o m m e n d \*  
the thesis for the defense.
