

Assessment proposed by the supervisor:

Assessment proposed by the reviewer:

Course of the defence:

The candidate presented the content of his thesis - comparison of bioinformatic pipelines used for fish e-DNA metabarcoding. The presentation was topical, succinct, and on time.

Supervisor: Appreciated the complexity of the thesis, its scientific utility, and candidate's dedication to this work.

Reviewer had a few technical/programming questions. Committee members were interested in various aspects of environmental DNA sampling.

Score:

June 4, 2021

Assessment:

excellent (4x1, 1x2)

Date of defence:

1

committee chairman
