

Course of the defence: Prof. Vařcha welcomed the student and the committee (all members present), and the guests.

Student introduced Actinomyces and the importance of the studied genes. Then, results were published and discussed. Co-supervisor and opponent presented their reviews. Student answered the questions of the opponent and questions of the committee on the phylogenetic analysis and bioassays, and on the variation in the hemA gene.

Score: 30
Assessment: very good
Date of defence: 16.9.2021
