

Assessment proposed by the supervisor:

Assessment proposed by the reviewer:

Course of the defence:

The student presented his thesis, applying genomic methods to track effects of repositionable drugs in medicine.

The committee was then presented with supervisors' and opponents' assessments. Both reviews had some minor reservations, mainly regarding the format and reference use. These were well explained by the student on the grounds of extend of the thesis.

Score:

Assessment: excellentDate of defence: March 24, 2021
