

Assessment proposed by the supervisor:

Assessment proposed by the reviewer:

Course of the defence:

- The following questions were asked after the presentation^x
- Do you have an idea or explanation why P-I and L-I are different?
 - Why are some amino acids missing for L-I in several proteins?
 - What are the protein specific differences in the AA distributions?
 - What is the biological function of proteins where some AA are missing in the L-I?
 - Does the full AA distribution of a membrane protein bias the relative differences of AA^{at the respective} interfaces?

Anna made a nice presentation and could answer all questions satisfactorily!

Score:

Assessment: very good

EXCELLENT.

Date of defence: 17.06.2021
