

Assessment proposed by the supervisor:

Assessment proposed by the reviewer:

Course of the defence:

The candidate presented his thesis "Understanding protein function prediction using machine learning". Supervisors' and opponents reviews were then read and discussed. Dr. Vohnout then asked for the most important output of the thesis, which was sufficiently explained. There were some reservations regarding the thesis format and presentation.

Score:

Assessment: very good (=2)

Date of defence: 24.5.2021
