

Průběh obhajoby bakalářské práce:

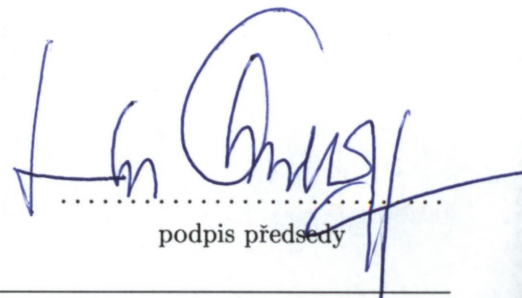

Prof. Gombhofer welcome Sewmi Mudiyanseleage and the members of the Commission. The supervisor and the reviewer were not present, supervisor specialist Dr. Nejo was present. The student described the studied species (*O. menbake*) and epigenetics. Then histone modifications and the respective enzymes were described.

After description of the methodology, the results on histone methyltransferase were shown together with the conclusions.
