

Průběh obhajoby bakalářské práce:

Supervisor's statement: good field & lab work & valuable data generation: very positive summary (will culture to masters).

Presentation: Introduction: comprehensive & appropriate

Main aims: well defined (why compare to *Bombix mori*?) Methods: well explained with useful animations, Results: - very clear (isolating fusions/translocations) in relation lepidopteran species to *Bombix mori*. Conclusions: - very clear & not controversial i.e. χ^2 lepidoptera: asexual sex determination (re: spermatogenesis). NICE ACKNOWLEDGEMENTS.

Opponent & commission questions: Opponent with very favorable overall ~~questions~~ impression (publication quality data).

Opponent's questions well fielded, with prepared slides/animations. Commission's questions: also well fielded, with minimal assistance from supervisor.

Body: 150x4, 145x1

Klasifikace: grade 1 Výborně (15)

Celková klasifikace:

Datum obhajoby: grade 1 Výborně
