Dr. Babak Minofar, Ph.D.

Supervisor statement for supporting thesis defense of MSc. Meysam Aryafard

I have known Meysam since the spring of 2017 when he expressed his interest to perform a Ph.D. at the University of South Bohemia. He participated in the online entrance exam, which was coordinated by the University of South Bohemia as a part of formal university procedures for the acceptance of Ph.D. students. He started his Ph.D. in 2018 under my supervision. During his study, he studied the interaction of biomolecules and surfaces in the aqueous and non-aqueous media.

He has performed theoretical and computational studies on the solvation structure and dynamics of ionic liquids and deep eutectic solvents. He also performed experimental works on the synthesis of some ionic liquids. His computational results and experimental findings are published as scientific papers in international scientific journals. As he has fulfilled all requirements including all mandatory exams and duties therefore, I recommend Meysam to defend his Ph.D. thesis in front of the committee.

Dr. Babak Minofar, Ph.D.
