To whom it might concern

Supervisor opinion on RNDr. Kateřina Diáková :

Kateřina is an independent, practical and communicative person. She is fast in understanding and she has no problem to formulate targeted hypotheses and goals and to discuss the studied topic. She is very careful planning and preparing experiments and she has no problem to work or to take responsibility within the group. She has good organization skills, can get along with people and her easy-going character became evident mainly during field work. Kateřina has great experience with field work in remote areas under harsh conditions.

Kateřina is not easy writing person. Writing is rather painful job which she postpones at the last minute. Thanks to her sense of detail, Kateřina hardly develops straightforward simple story. But, if necessary, she is persistent and does not give up, which I really appreciate. She fully understand the rule "publish or perish".

As an individual, I found Kateřina to be very careful and highly responsive in all her doings. She is motivated in her professional carrier but she has problem concentrating on one problem. She is creative, reliable, friendly and always ready to help. Her personality traits make her a valuable member of the team.

It is my pleasure to recommend Kateřina's thesis for a defence.
