Comments of the supervisor on the student and the thesis:

The student did a great job in learning new experimental methods and understanding the rationale behind the hypotheses and tests. The student showed independence during the handling of the data and calculating the parameters of interest based on the indications provided. The student showed the ability to synthesize the results and conduct a literature review, which resulted in the first thesis draft written entirely by the student. The student responded favorably to constructive feedback and implemented necessary changes in the final thesis draft.

Conclusion:

In conclusion, I
r e c o m m e n d
the thesis for the defense.
