Eventual additional comments of the supervisor on the student and the thesis:

Paul was supposed to setup completely new approach to measure metabolites ex vivo. He was absolutely independent and very skillful and that is why he was successful in setting up the procedure. This could be a very important step in our project since the established method could be used for crucial experiments. I have to say that Paul is outstanding student and very great person to work with, one of the top that I had a chance to work with.

Conclusion:

In conclusion, I

r e c o m m e n d the thesis for defense.
