

Průběh obhajoby bakalářské práce:

Prof. Grotzinger greeted the student and the commission. Nora Hagleitner introduced her work including the notch signaling and the studied model of *Drosophila*. Then, she explained her experiments and also the results regarding the studied gene. She proposed also some future possible experiments providing more insight into the studied problem.

The supervisor, Dr. Kojan, read her statement, followed by the reviewer. Next, she answered the questions of the reviewer and also questions from the audience (temperature of growth, knock-down, etc.)
